AN IN-DEPTH STUDY OF
THE BOOK OF JOB

AND THE LORD
Blessed
JOB

Elizabeth Bagwell Ficken

IS THERE A BEHEMOTH IN YOUR LIFE

Genesis 1

24 Then God said, "Let the earth produce living creatures according to their kinds: livestock, creatures that crawl, and the wildlife of the earth according to their kinds." And it was so.

And God saw that it was good. **26** Then God said, "Let Us make man in Our image, according to Our likeness. They will rule the fish of the sea, the birds of the sky, the animals, all the earth, and the creatures that crawl on the earth."

31 God saw all that He had made, and it was very good. Evening came, and then morning: the sixth day.

"Thus saith the Lord!"

When I was a child, I watched my dad read the Scriptures and passionately declare, "Thus saith the Lord!" He was always researching what the liberal critics of the day were saying so that he could find answers and equip us to defend our faith. If he came... [Show more](#)

God's first words after the Fall were, "Where are you?" It is only one word in Hebrew, אַיְכָה (ayekah). In that one word is compressed a whole theology:
•God seeks out the lost sinner.
•God welcomes him to confess.
•God denies his restoration.
•God works his redemption.

Atheism is not the knowledge that God does not exist, but only the wish that He did not, in order that one could sin without reproof or melt one's ego without change. The pillars of the world stand strong, but we

ALL PEOPLE DO KNOW IN THEIR HEART OF HEARTS THE BIBLICAL GOD. BECAUSE GOD HAS REVEALED HIMSELF TO EVERYONE. THE PROBLEM IS NOT THAT PEOPLE ARE UNAWARE OF GOD. THE PROBLEM IS THAT THEY 'SUPPRESS THE TRUTH BY THEIR WICKEDNESS (ROM 1:18)'

SWIRLING SANDSTONE - FLOOD GEOLOGY

Zion National Park in Utah consists of rock made from a 2,200 foot thick layer of sand called Navajo Sandstone. Within this Navajo Sandstone are many layers of sloping mounds or waves of sand (seen pictured). The waves indicate that water moved the sand. Where did the sand come from?

After surveying 15,000 North American locations and taking more than half a million geological measurements, the American Geological Society has determined ... [See more](#)

Seastar Skeletal Evolution?

The beautiful sea stars ("starfish"), classified as echinoderms, are one of the most easily identifiable marine invertebrates, with their characteristic radiating arms and stony skin of calcium carbonate. The sea star's water vascular system is one of the more amazing and complex arrangements in the animal world. The brittle stars
